About the Amazon Music App for Android

With the Amazon Music app, you can play or download your music library on your Android device running Android OS version 4.0 or higher.

If the Amazon Music application isn't pre-installed on your device, you can install it by launching the Amazon Appstore app or Google Play and searching for "Amazon Music." You can also open [Amazon Music Apps](#) on your Android device to go directly to the Amazon Music installation page.

Follow the onscreen instructions to complete the app download and sign in. When signing in, make sure you enter the same Amazon account and password you use to shop for music and access [your music library](#) on the web.

Tip: You can also install the Amazon Music app widget on your device home screen. With the Amazon Music widget, you can control music playback from your home screen, or play songs in shuffle mode. To install the widget, either press and hold an empty part of your screen, tap **Widgets**, and then tap **Amazon Music**. Or, tap **Apps** at the bottom of your home screen, tap **Widgets**, and then drag the widget to the position you want.

Once you've installed Amazon Music, swipe from the left edge of your screen or tap the **Menu** button to access Your Library. Music you've purchased or added to your music library is available under **Cloud**. Music already stored on your device, and songs and albums that you download appear under the **Device** tab. To learn more about importing music from your computer to your music library, go to [Import Your Music](#).

Note: If you don't see some of your music under Cloud, select **Settings** from the menu, and then tap **Refresh Your Music Library**

To shop for new music from the [Digital Music Store](#), tap the **Store** option onscreen or in the menu.

Note: To purchase digital music from Amazon.com, verify that your device language is set to English (U.S.) through your device's language settings.

If you have an eligible Prime membership, you can also stream and download Prime Music using the Amazon Music App. If you're not seeing Prime Music on your device, app, or account, make sure you meet the eligibility requirements by going to [Am I Eligible for Prime Music?](#)
